

Capstone Data — Reach 20+ Fights

Day 15

Lesson 15

Nora XIE

Course 02

Phase 3 — Game Analyst (Track B)

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Reach 20+ rows in fights.csv
- ★ Run summarize + chart on capstone data
- ★ Note one pattern in the numbers

Course 02 quest map: Day 15 of 18

Hook

Twenty fights is enough to argue something — not everything. Look for patterns.

Learn

Learn

Ask:

- Which command appears most?
- Did you win more when defending first?
- Is dragon HP too high at round 1?

Update game or JSON if you find a obvious bug — log a **patch note**.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Demo code

Folder: day15/

```
1 # Reuse your Day 9/10 scripts on assignment/fights.csv
2 print("Point this at your capstone fights.csv")
```

 Try it

In terminal, `cd course02/day15`, then predict output, then run: `python demos/demo_capstone_stats.py`

 Assignment

Work in: `day15/assignment/`

- A — **Written** Hypothesis before looking at chart: which command wins most?
- B — **Run** `summarize.py` and `make_chart.py` on capstone CSV.
- C — **Level up** Total fights ≥ 20 . Save `capstone_chart.png`.
- D — **Explain** One pattern that matched or broke your hypothesis.

 Checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest part today?
2. One line you can teach a friend.

Tomorrow: Write the analyst report.
