

for Loops & Guess My Number

Day 05

Lesson 05

Nora XIE

Vibe Coding Bootcamp

Phase 1

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Repeat with for and range()
- ★ Build Guess My Number
- ★ Explain 5 lines without AI first

Quest map: Day 05 of 22

Hook — why today matters

Loops save copy-paste. Boss fights use repeated attacks—loops do that in code.

Big idea

Learn

`for i in range(10):` runs 10 times. Use loops for countdowns and limited guesses.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Predict → Run → Investigate → Modify → Make

Demo code

Folder: day05/

```
1 for n in range(10, 0, -1):
2     print(n)
3 print("GO!")
```

Guided practice

Try it

In terminal, `cd day05`, then predict output, then run: `python demos/demo_countdown.py`

Assignments

Assignment

Work in: `day05/assignment/`

A — Predict How many lines print from `range(3)`?

B — Debug `assignment/buggy_guess.py` (off-by-one attempts).

C — Level up `assignment/guess_my_number.py`: secret number, 7 tries, hints higher/lower.

D — Explain five lines from your guess game aloud (written summary).

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: Lists and inventory.
