

while Loops & Menus

Day 07

Lesson 07

Nora XIE

Vibe Coding Bootcamp

Phase 2

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Use while for play-again menus
- ★ Avoid infinite loops safely
- ★ Know Ctrl+C stops a runaway loop

Quest map: Day 07 of 22

Hook — why today matters

Main menu screens loop until you quit—that is a while loop.

Big idea

Learn

`while condition:` repeats until false. Update variables inside or loop never ends!

AI rules today

If stuck in infinite loop: Ctrl+C. AI: hint only which variable to change.

Predict → **Run** → **Investigate** → **Modify** → **Make**

Demo code

Folder: day07/

```
1 choice = ""
2 while choice != "q":
3     choice = input("1=Play 2=Quit (q): ")
4     if choice == "1":
5         print("Playing...")
6 print("Bye!")
```

Guided practice

Try it

In terminal, `cd day07`, then predict output, then run: `python demos/demo_menu.py`

Assignments

Assignment

Work in: `day07/assignment/`

- A — **Predict** When does a `while True` stop? (concept)
- B — **Debug** `assignment/buggy_menu.py` — loop never exits.
- C — **Level up** Menu around your guess game or new `menu.py`.
- D — **Explain** One reason `while` is separate from `for` (we learned for first).

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: Functions.
