

Decisions (if / elif / else)

Day 04

Lesson 04

Nora XIE

Vibe Coding Bootcamp

Phase 1

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Write branches for game rules
- ★ Combine conditions with and/or
- ★ Build a choose-your-path story

Quest map: Day 04 of 22

Hook — why today matters

Yes → fight No → game over

Every game checks rules: enough HP? picked up sword?

Big idea

Learn

if/elif/else choose paths. Comparisons: ==, <, >=. Combine with and, or.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Predict

Run

Investigate

Modify

Make

Demo code

Folder: day04/

```
1 answer = input("Take the sword? (y/n): ")
2 if answer == "y":
3     print("You equip Sword +5!")
4 elif answer == "n":
5     print("You walk past.")
```

```
6 else:
7     print("Try y or n.")
```

Guided practice

Try it

Run `demo_sword.py`. Predict output for `y` and `n` before each run.

Assignments

Assignment

Work in: `day04/assignment/`

A — Predict before running:

1. `if 3 > 5: print("A") else: print("B")` → _____
2. `if 10 >= 10: print("tie")` → _____
3. `if "" == "y": print("yes")` → _____

B — Debug `assignment/buggy_path.py` (wrong `=` vs `==`).

C — Level up `assignment/choose_path.py` with 3 choices and endings.

D — Explain Difference between `=` and `==`?

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: for loops and countdowns.
