

Dictionaries & JSON

Day 15

Lesson 14

Nora XIE

Vibe Coding Bootcamp

Phase 3

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Use dict for game data
- ★ Load enemies.json
- ★ Balance game without code changes

Quest map: Day 15 of 22

Hook — why today matters

Today you level up your builder skills.

Big idea

Learn

Dictionaries use keys like `hp` and `atk`. `json.load` reads config files.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Predict

Run

Investigate

Modify

Make

Demo code

Folder: day15/

```
1 import json
2 enemy = {"name": "Slime", "hp": 12, "atk": 3}
3 print(enemy["name"], "HP", enemy["hp"])
```

Guided practice

Try it

In terminal, `cd day15`, then predict output, then run: `python demos/demo_json.py`

Assignments

Assignment

Work in: `day15/assignment/`

- A — Predict `d["hp"]` when `d={"hp":10}`?
- B — Debug `assignment/buggy_dict.py`
- C — Level up `assignment/enemies.json` + loader script (or `data/` subfolder).
- D — Explain One advantage of JSON for game designers.

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: Multi-file project.
