

Debug with AI (Controlled)

Day 18

Lesson 17

Nora XIE

Vibe Coding Bootcamp

Phase 4

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Fix broken code in ≤ 3 AI chats
- ★ Use hints not full solutions
- ★ Complete AI-free Parsons fix

Quest map: Day 18 of 22

Hook — why today matters

Today you level up your builder skills.

Big idea

Learn

Protocol: reproduce, hypothesis, one change, run again. Log in `debug_journal.md`.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Demo code

Folder: day18/

```
1 total = 0
2 for i in range(1, 5): # BUG: should sum 1..10
3     total = total + i
4 print("Sum 1..10 should be 55:", total)
```

Guided practice

Try it

In terminal, `cd day18`, then predict output, then run: `python demos/broken.py`

Assignments

Assignment

Work in: `day18/assignment/`

- A — **Predict** output of `broken.py` before fix.
- B — **Fix** `demos/broken.py` with max 3 AI messages (log prompts).
- C — **AI-free** Fix `assignment/parsons.py` order (scrambled lines).
- D — **Journal** `assignment/debug_journal.md` — what broke, what fixed it.

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: Capstone MVP build (Day 19).
