

Final Exam

Day 22

Lesson FN

Nora XIE

Vibe Coding Bootcamp

Assessment — Lessons 1–20

Time: 90 min

Mode: Self-study

Today's goals:

- ★ Demonstrate full bootcamp skills
- ★ Present capstone
- ★ Show honest AI collaboration

Quest map: Day 22 of 22

Watch out

Exam rules: Part I–II: no AI. Part III: max 3 logged AI messages for `final_broken.py` only. Part IV–V: no AI.

Instructions

Final boss fight—but you have save points (Git) and skills.

Demo code

```
1 def average(scores):
2     return sum(scores) / len(scores)
3 print(average([]))
```

Exam tasks

Assignment

Part I (15 min) — Predict (no run first):

- `[1,2] + [3]` — error or list?
- `d = {} d["x"]=1 print(d["x"])`
- `for i in range(2): pass` — how many times?
- `try: int("3") except ValueError: print("bad")` — output if no error?
- `2 == 2 and 3 < 1` — True or False?

Part II (20 min) — Written:

- Name three sections every good README needs.
- Write a sample commit message for “fixed crash on empty name”.
- What does `git push` do in one sentence?

Part III (25 min) — Fix `assignment/final_broken.py` (AI log if used).

Part IV (35 min) — Capstone demo + portfolio review rubric.

Part V (10 min) — Reflection and integrity statement.

Rubric (parent/coach)

Part	Criterion	Pts
I	Python review	15
II	Git/README written	20
III	Debug <code>final_broken.py</code>	25
IV	Capstone demo+rubric	30
V	Reflection	10

Self-study checklist

- ☐ Read all parts before starting
- ☐ Part I: predictions without computer
- ☐ Parts II–V: follow time limits
- ☐ Parent sign-off where marked
