

Setup Day — Tools & Contract

Day 00

Lesson 00

Nora XIE

Vibe Coding Bootcamp

Before the quest — parent + Nora together

Time: 30–45 min

Mode: Self-study

Today's goals:

- ★ Open the right folder in Cursor
- ★ Run two safe commands with a parent
- ★ Sign your coding promise

Hook — why today matters

 **Load your save file**
Python + Cursor ready → Day 1 starts tomorrow

Today is not a hard coding lesson. It is a simple setup quest so Day 1 feels easy and fun.

Big idea

Learn

Three words for today:

- **Folder:** where your files live.
- **Terminal:** where you type commands.
- **Run:** tell the computer to do the instructions.

Tomorrow you will run your first real Python program in the next lesson folder.

Vocabulary: folder, terminal, run, predict.

AI rules today

Simple rule for Day 0:

- Parent handles installs.
- Nora can ask questions.
- No pip, no Git, no big AI prompts today.

Demo code

Folder: day00_setup/

Open: day00_setup/demos/SETUP_CHECKLIST.md

Guided practice

Try it

Step 1 — Open terminal in Cursor

1. Parent opens Cursor and the folder Nora AI Training.
 2. Open terminal.
 3. Type: `python -version`
 4. Write what you see in `assignment/setup_notes.txt`.
- If this fails, stop and ask parent to fix setup first.

Try it

Step 2 — Run one tiny demo (with parent)

1. In terminal: `cd course/day00_setup`
2. Type: `python demos/demo_setup_hello.py`
3. You should see 3 lines of text.
4. Open that file and change one sentence.
5. Run the same command again.

Assignments

Assignment

Work in: `day00_setup/assignment/`

A — Contract

- Read `CONTRACT.md` with parent.
- Add initials in `assignment/setup_notes.txt`.

B — Parent checklist

- Parent completes `../parent-setup.md`.
- Nora checks each box she understands.

C — Quick notes In `assignment/setup_notes.txt`, fill in:

1. Python version
2. “I can find the next lesson folder” (yes/no)
3. One thing I feel excited about

D — Short writing (2 lines only)

- What does **predict** mean?
- Why do we keep AI simple on Day 1?

Self-study checklist

- ☐ Finish setup checklist with parent (30–45 min)
- ☐ Read and sign `CONTRACT.md`
- ☐ Skim prompt sheet in `shared/prompts.md`
- ☐ Ready for Day 1 tomorrow

Reflection

Write one sentence: what felt easiest today?

Tomorrow: Day 01: Hello, Python! Your first program.
