

Lists & Inventory

Day 06

Lesson 06

Nora XIE

Vibe Coding Bootcamp

Phase 2 — Python is a game language

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Create and change lists
- ★ Loop over items
- ★ Build a simple inventory

Quest map: Day 06 of 22

Hook — why today matters

Your backpack in Minecraft is a list. Python lists hold many values.

Big idea

Learn

`items = ['potion', 'key']`. Use `append`, `len`, index `[0]`. Loop: `for item in items:`.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Demo code

Folder: day06/

```
1 inventory = ["sword", "potion"]
2 print("Bag:", inventory)
3 inventory.append("shield")
4 for item in inventory:
5     print("-", item)
```

Guided practice

Try it

In terminal, `cd day06`, then predict output, then run: `python demos/demo_inventory.py`

Assignments

Assignment

Work in: `day06/assignment/`

- A — Predict `len([1,2,3])` last index of 3-item list?
- B — Debug `assignment/buggy_list.py`
- C — Level up `assignment/inventory.py`: add item, list all, check if has "key".
- D — Explain Why does index start at 0? (2 sentences)

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: while loops and menus.
