

Functions

Day 08

Lesson 08

Nora XIE

Vibe Coding Bootcamp

Phase 2

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Write def with parameters and return
- ★ Refactor repeated code
- ★ Ask AI to explain parameters only

Quest map: Day 08 of 22

Hook — why today matters

Today you level up your builder skills.

Big idea

Learn

`def roll():` packages steps. `return` sends a value back. Functions = reusable skills.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Predict → Run → Investigate → Modify → Make

Demo code

Folder: day08/

```
1 def greet(name):
2     return f"Hello, {name}!"
3
4 def roll_d6():
5     import random
6     return random.randint(1, 6)
7
8 print(greet("Nora"))
9 print("Roll:", roll_d6())
```

Guided practice

Try it

In terminal, `cd day08`, then predict output, then run: `python demos/demo_functions.py`

Assignments

Assignment

Work in: `day08/assignment/`

A — Predict `def add(a,b): return a+b` then `print(add(2,3))` → _____

B — Debug `assignment/buggy_func.py` (return vs print).

C — Level up Three functions in `assignment/game_funcs.py`.

D — Write a C-R-A-V prompt you could use to ask about parameters (do not paste AI answer).

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: Mini project day.
