

Mini Project — RPS or Dice Dungeon

Day 09

Lesson 09

Nora XIE

Vibe Coding Bootcamp

Phase 2

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Combine skills in one game
- ★ Write tried-notes before AI
- ★ Low AI on final make

Quest map: Day 09 of 22

Hook — why today matters

Today you ship a real mini-game. AI is quiet while you design.

Big idea

Learn

Plan in comments first: rules, inputs, win condition. Then code in small chunks.

AI rules today

Make: design sentence first. AI may suggest one function at a time—you edit every line.

Predict — **Run** — **Investigate** — **Modify** → **Make**

Demo code

Folder: day09/

```
1 # Stub
2 import random
3 options = ["rock", "paper", "scissors"]
```

Guided practice

Try it

In terminal, `cd day09`, then predict output, then run: `python demos/demo_rps_stub.py`

Assignments

Assignment

Work in: `day09/assignment/`

- A — **Predict** outcomes for rock vs scissors (written).
- B — **No bug file** — your project IS the assignment.
- C — **Level up** `assignment/rps.py` OR `dice_dungeon.py` (40+ lines, playable).
- D — **Explain** three bullets: what I tried before asking AI.

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: random module polish.
