

Randomness & Polish

Day 10

Lesson 10

Nora XIE

Vibe Coding Bootcamp

Phase 2

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Use `random.randint` and `choice`
- ★ Playtest and log bugs
- ★ Phase 2 gate: demo to parent

Quest map: Day 10 of 22

Hook — why today matters

Today you level up your builder skills.

Big idea

Learn

`import random. randint(a,b), choice(list)`. Playtest 5 rounds; write `BUGS.md`.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Predict → Run → Investigate → Modify → Make

Demo code

Folder: `day10/`

```
1 import random
2 loot = ["common", "rare", "legendary"]
3 for _ in range(5):
4     print("Drop:", random.choice(loot))
```

Guided practice

Try it

In terminal, `cd day10`, then predict output, then run: `python demos/demo_random.py`

Assignments

Assignment

Work in: `day10/assignment/`

- A — Predict Is `randint(1,6)` ever 7?
- B — Debug `assignment/buggy_random.py`
- C — Level up Add random encounters to Day 9 project.
- D — Explain one bug you found playtesting (from `BUGS.md`).

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: Midterm tomorrow (Day 11)! Review lessons 1–10 tonight.
