

Midterm Exam

Day 11

Lesson MT

Nora XIE

Vibe Coding Bootcamp

Assessment — Lessons 1–10

Time: 75–90 min

Mode: Self-study

Today's goals:

- ★ Show Python skills from Phase 1–2
- ★ Debug without full AI solutions
- ★ Demonstrate mini project #1

Quest map: Day 11 of 22

Watch out

Exam rules: All parts: AI off for solutions. Parent may time and observe only. You may use notes from Days 1–10.

Instructions

You have built real games. Today you prove what you know—predict first, AI off unless noted.

Demo code

```
1 def score_round(a, b):  
2     if a > b:  
3         return 2  
4     return 1  
5 print(score_round(3, 3))
```

Exam tasks

Assignment

Part I — Predict then Run (20 min) — no computer first. Write predictions:

1. `print(3 * 4 + 1)`
2. `x = 5` then `print(x + 2)`
3. `print("a", "b")`
4. `for i in range(3): print(i)`
5. `if 10 > 3: print("yes")`
6. `len([4,5,6])`
7. `def f(): return 2 print(f())`

8. `import random` — `random.randint(1,3)` always 0? (yes/no + why)

Part II — Debug (20 min) — Fix `assignment/midterm_buggy.py`.

Part III — Extend (25 min) — Add ONE feature to your Day 9 game (pick one):

- show win/loss count after 3 rounds
- reject empty input with a message
- add a “secret cheat code” that gives a bonus (HP, score, or extra round)

Part IV — Written (15 min) — C-R-A-V letters; when is AI allowed in normal lessons?

Parent sign-off — Student explained 5 lines of own code aloud ✓

Rubric (parent/coach)

Part	Criterion	Pts
I	Predict–Run (8 items)	25
II	Debug <code>midterm_buggy.py</code>	25
III	One game extension	30
IV	Written + 5-line explain	20

✓ Self-study checklist

- ☐ Read all parts before starting
- ☐ Part I: predictions without computer
- ☐ Parts II–V: follow time limits
- ☐ Parent sign-off where marked
