

Git — Save Points

Day 12

Lesson 11

Nora XIE

Vibe Coding Bootcamp

Phase 3 — Build, save, share

Time: 60–75 min

Mode: Self-study

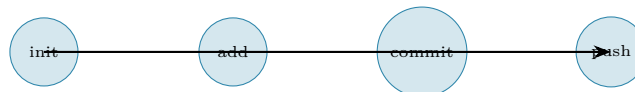

Today's goals:

- ★ Initialize a git repo
- ★ commit with clear messages
- ★ View history with git log

Quest map: Day 12 of 22

Hook — why today matters

Git is a save-game system for code. Each commit is a checkpoint you can return to.

Big idea

Learn

`git init, status, add, commit -m 'message'`. Good messages: verb + what changed.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Demo code

Folder: day12/

Open: day12/demos/README_git.md

Guided practice

Try it

Read demos/README_git.md. With parent, run `git -version` in terminal.

Assignments

Assignment

Work in: `day12/assignment/`

A — Written List three commands in order to save work.

B — Practice Make 3 commits in your bootcamp folder (parent helps if auth needed).

C — Level up `assignment/COMMIT_LOG.txt` — copy three commit messages you wrote.

D — Explain What is the difference between `add` and `commit`?

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: Errors and `try/except`.
