

Multi-file Project & README

Day 16

Lesson 15

Nora XIE

Vibe Coding Bootcamp

Phase 3

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Split code across files
- ★ Write GitHub README
- ★ Push project to GitHub

Quest map: Day 16 of 22

Hook — why today matters

Today you level up your builder skills.

Big idea

Learn

from game_logic import roll — same folder. README: title, run steps, screenshot note.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Predict

Run

Investigate

Modify

Make

Demo code

Folder: day16/

```
1 # see assignment/game_logic.py
```

Guided practice

Try it

In terminal, `cd day16`, then predict output, then run: `python demos/demo_import.py`

Assignments

Assignment

Work in: `day16/assignment/`

- A — **Written** What three sections belong in a README?
- B — **Debug** `assignment/buggy_main.py` — fix the import error.
- C — **Level up** `main.py` + `game_logic.py` + `README.md`, push to GitHub.
- D — **Explain** Why split code into two files?

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: Plan your capstone spec (Lesson 16, Day 17).
