

Capstone Day 1 — MVP

Day 19

Lesson 18

Nora XIE

Vibe Coding Bootcamp

Phase 5 — Ship something real

Time: 60–75 min

Mode: Self-study

Today's goals:

- ★ Implement core capstone mechanic
- ★ Commit working MVP
- ★ Track tasks in README

Quest map: Day 19 of 22

Hook — why today matters

Ship day! Dungeon, quiz, or loot sim—your spec leads.

Big idea

Learn

MVP only today: one path through the program end-to-end. Commit when it runs.

AI rules today

Predict/Run: AI off. **Investigate:** Socratic hints only. **Make:** you review every line.

Predict — **Run** — **Investigate** — **Modify** — **Make**

Demo code

Folder: day19/

```
1 print("Replace with your capstone MVP")
```

Guided practice

Try it

In terminal, `cd day19`, then predict output, then run: `python demos/capstone_stub.py`

Assignments

Assignment

Work in: `day19/assignment/`

- A — Predict** In your spec, what is the **smallest** input that could break your MVP?
- B — Debug** Run MVP once; fix the first crash you see (even small).
- C — Main** Build MVP listed as Task 1–2 in your spec.
- D — Explain** What is working in MVP? What is not built yet?

Self-study checklist

- ☐ Re-read **Learn**; predict outputs (10 min)
- ☐ Assignments A–D (35–45 min)
- ☐ Run your program 3 times with different inputs
- ☐ 3-bullet “what I tried” note
- ☐ Stuck 15 min → C-R-A-V (`../shared/prompts.md`)

Reflection

1. Easiest vs hardest today?
2. One line you can teach a friend.

Tomorrow: Capstone features.
