

Final Exam — Game Studio + Data Lab

Day 18

Lesson FN

Nora XIE

Course 02

Assessment — Full Course 02

Time: 90 min

Mode: Self-study

Today's goals:

- ★ Show module + CSV + chart skills
- ★ Present analyst capstone
- ★ Explain one data-driven design choice

Course 02 quest map: Day 18 of 18

⚠ Watch out

📖 **Exam rules:** Part I–II: no AI. Part III: max 3 logged AI messages for `final_broken.py` only. Part IV–V: no AI.

Instructions

Final boss — but you have save points, charts, and a dragon log.

</> Demo code

```
1 import csv
2
3 def average_player_hp(path):
4     with open(path) as f:
5         rows = list(csv.DictReader(f))
6         total = 0
7         for r in rows:
8             total += int(r["player_hp"])
9         return total / len(rows) # BUG on empty file
10
11 print(average_player_hp("fights.csv"))
```

✎ Exam tasks

Work in: `day18_final/assignment/` **Part I (15 min) — Predict (no run first):**

1. `import player` — what file must exist?
2. CSV mode "a" vs "w" — which adds rows?
3. `json.dump` needs which import?
4. `plt.savefig("x.png")` — when is file created?
5. Empty command in CSV — skip row or keep? (your midterm rule)

Part II (15 min) — Written:

1. Name two columns in your fight log and why.
2. What is a balance patch in one sentence?
3. What sections were in your `REPORT.md`?

Part III (20 min) — Fix `assignment/final_broken.py` (AI log if used).

**Exam tasks (continued)**

Work in: day18_final/assignment/ **Part IV (35 min)** — Capstone demo: run game, show chart, read one recommendation from REPORT.

Part V (5 min) — Integrity: one thing you learned in Course 02 that Course 01 did not teach.

Rubric (parent/coach)

Part	Criterion	Pts
I	Python/CSV/JSON review	15
II	Written (log + report)	15
III	Debug final_broken.py	20
IV	Capstone demo + insight	40
V	Reflection	10

**Checklist**

- ☐ Read all parts before starting
- ☐ Follow time limits per part
- ☐ Parent sign-off where marked
